

Supplementary Figure S3. A view of the $3[\text{Mn}(\text{Huca})(\text{Hpybim})_2]/\text{H}_2\text{O}$ aggregate formed through the lattice water molecules of (I). Atoms labelled with a plus sign (+) and an at sign (@) are at the symmetry positions $(x, -y+3/2, z+1/2)$ and $(x+1, -y+3/2, z+1/2)$, respectively.
