

Supplementary Materials for

Online_DPI: A web server to Calculate the Diffraction Precision Index for any Protein Structure

K. S. Dinesh Kumar, M. Gurusaran, S. N. Satheesh, P. Radha, S. Pavithra, K. P. S. Thulaa
Tharshan, John R Helliwell and K. Sekar

Legend to Supplementary Figures

Supplementary figure 1: A pie chart showing the fractions of PDB depositions that are without non-crystallographic symmetry (NCS) *i.e.* 20.3% , those with NCS applied (7.5%) and those with NCS but 'NULL' details as to whether the deposited model is with protein model refinement restraints applied or not (72.2%).

Supplementary figure 1
