Supporting information for article:

A modified discrete algebraic reconstruction technique for multiple gray image reconstruction for limited angle range tomography

Zhiting Liang, Yong Guan, Gang Liu, Xiangyu Chen, Fahu Li, Pengfei Guo and Yangchao Tian

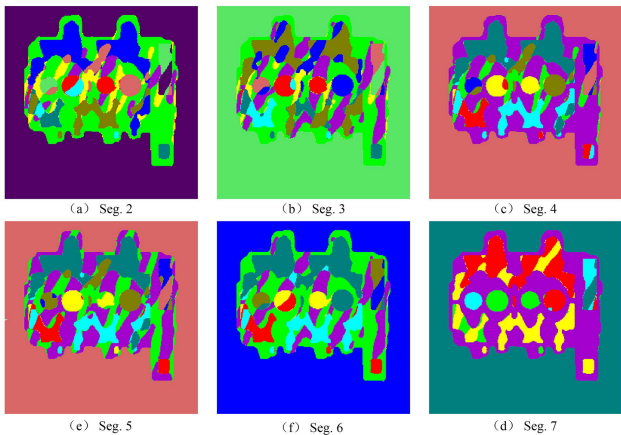

Figure S1 Segment results of the SART-TV reconstruction of the Phantom 3 with an angular range of $\alpha = 130^\circ$ (supplemental information to Fig. 10).

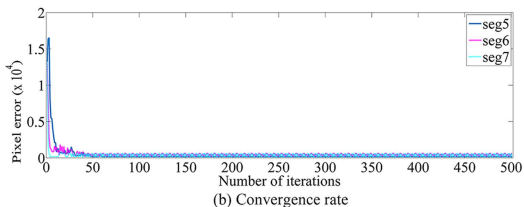

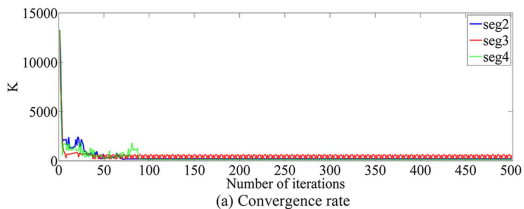

Figure S2 Convergence rate of the different segment results as an initial input of the MDART (supplemental information to Fig. 10).
