Resonant Inelastic X-ray Scattering Using a Miniature Dispersive Rowland Refocusing Spectrometer

Alexander S. Ditter, William M. Holden, Samantha K. Cary, Veronika Mocko, Matthew J. Latimer, Erik J. Nelson, Stosh A. Kozimor and Gerald T. Seidler

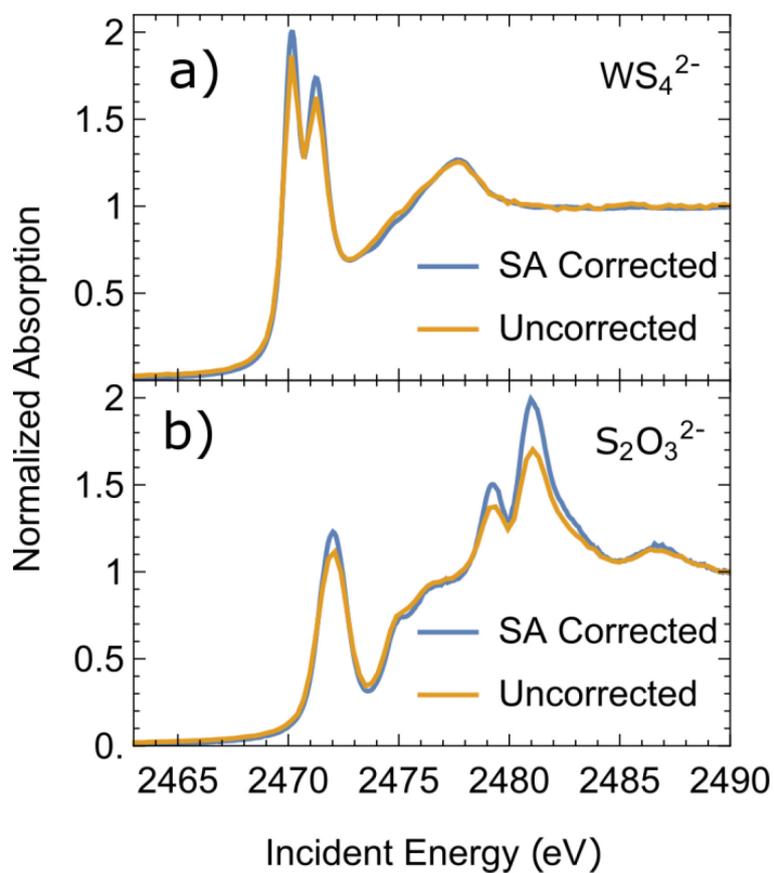

Figure S1 Comparison of XAS data calculated from the RIXS plane before (yellow) and after (blue) the self-absorption correction described in section 2.4 for both WS_4^{2-} (a) and $S_2O_3^{2-}$ (b). Uncorrected data was normalized to an edge step of 1.
