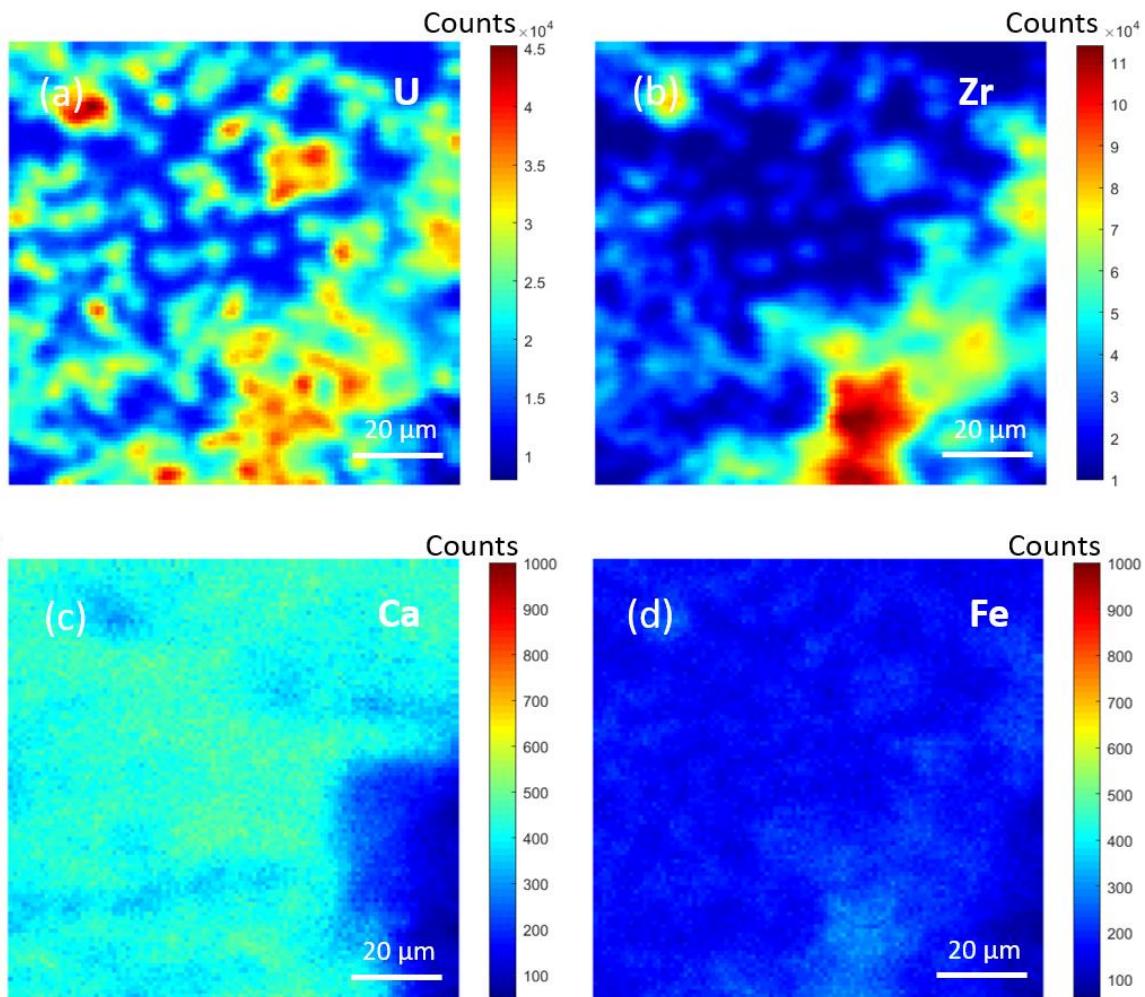

Figure S1 μ -focus fluorescence maps of Brown LFCM at 18,000 eV. Showing distribution of **a)** U La, **b)** Zr K α , **c)** Ca K α , and **d)** Fe K α fluorescence signals.

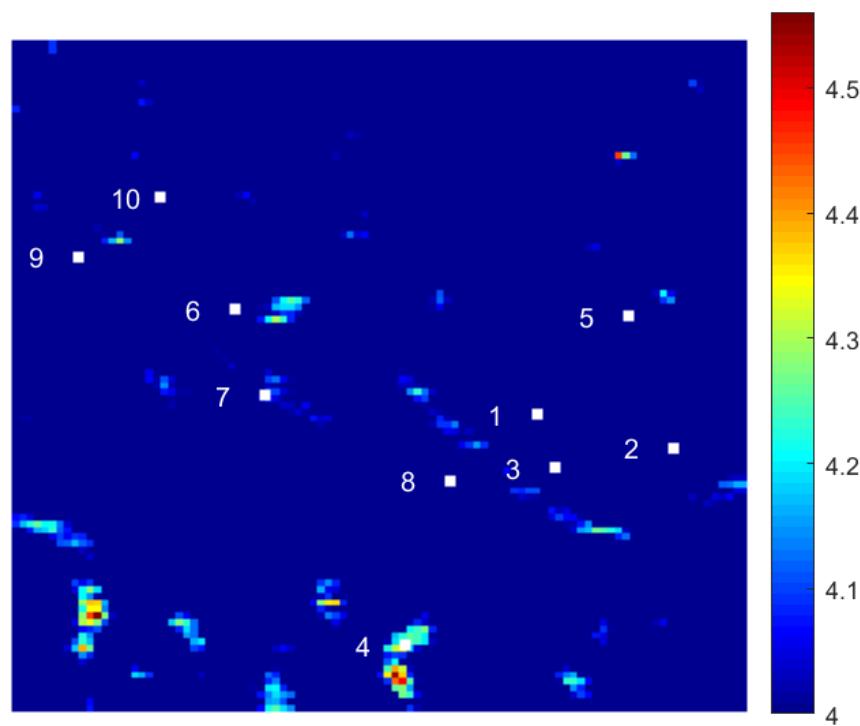

Figure S2 Chemical state mapping of Black LFCM derived from multiple scattering peak regression (MPR) analysis with locations of representative points selected for XANES data acquisition.

Table S1 μ -EXAFS fit parameters of representative points in simulant Black LFCM.
