

## Supplementary Analysis Etiracetam, and Etiracetam hydrate

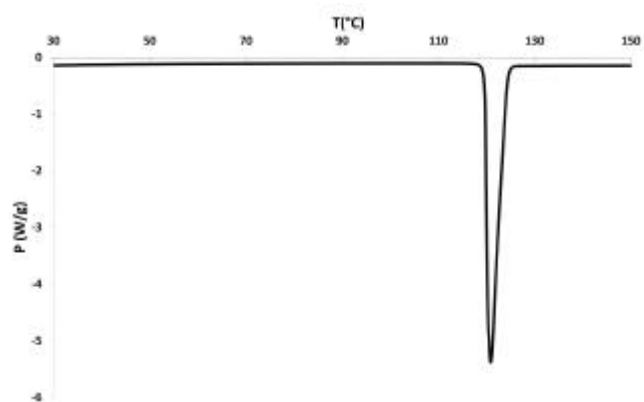

**Fig. 1. TGA analysis Etiracetam**

TGA analysis of Etiracetam in % of mass of sample with respect to the temperature. Degradation starts at about 140°C (= loss of 0.5% m)

**Fig. 2. XRPD analysis hydrate after storage at room temperature**

XRPD analysis of the hydrate sample, the sample after 2h and 12h at room temperature (25°C)

**Fig. 3. DSC analysis hydrate after storage at room temperature**

DSC analysis of the hydrate sample after 12h at room temperature (25°C).
