Supporting information for article:

The bond valence model as a prospective approach: examination of the crystal structures of copper chalcogenides with Cu bond valence excess

Yves Moëlo, Aurelian Florin Popa and Vincent Dubost

Figure list.

S1. Bond lengths in the crystal structure of HNO₃.

S2. Crystal structure of CuSe₂.

S3. Crystal structure of NaCu₄S₄.

S4. Crystal structure of TlCu₂Se₂.

S5. Crystal structure of NaCu₄Se₃.

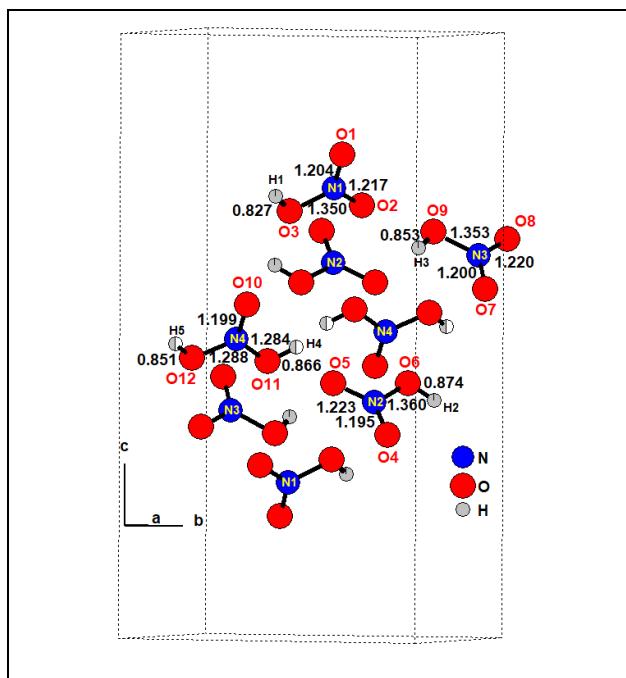

S6. Crystal structure of KCu₄Se₃.

S7. Crystal structure of YBi₂O₄Cu₂Se₂.

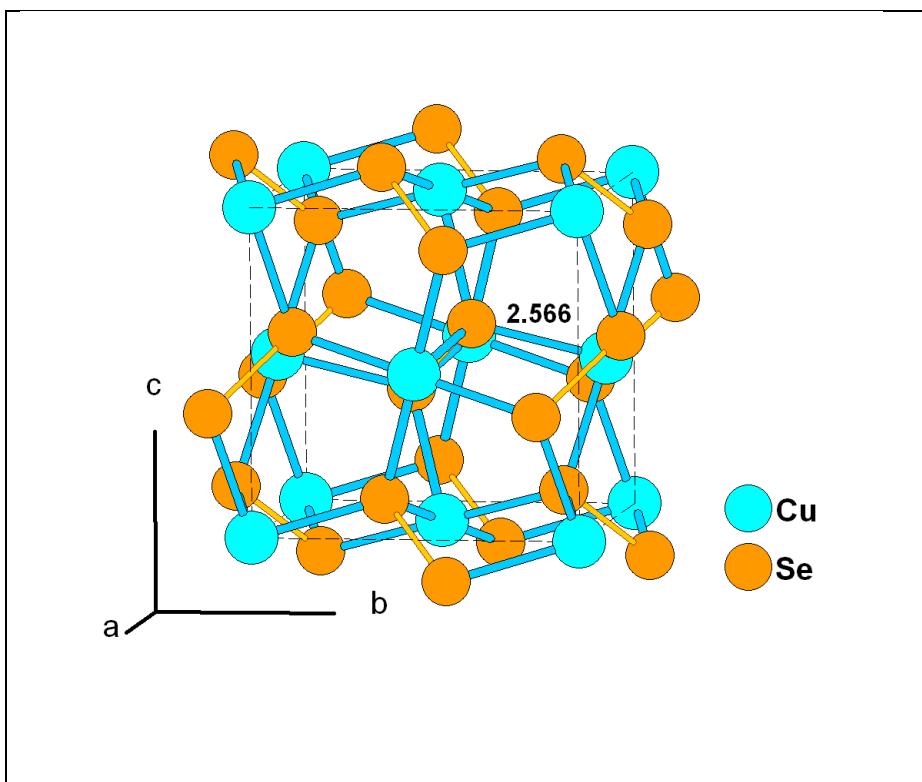

S8. Crystal structure of BiCuOSe.

References of crystal structures according to ICSD data base.

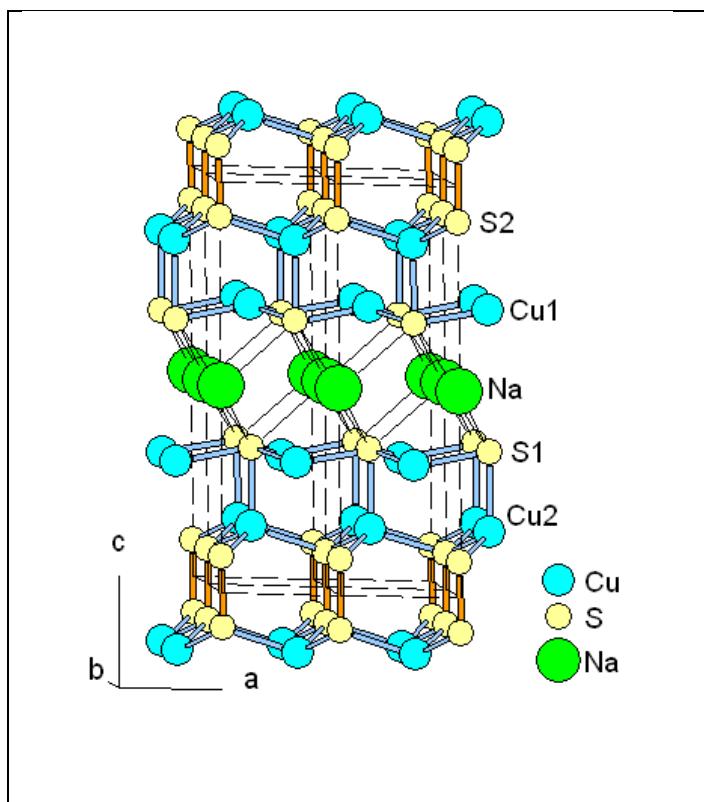

In Figs. S2 to S8, thick blue bonds connect Cu and chalcogen atoms implicated in the distribution of the ligand electron in excess.

Figure S1. Bond lengths in the crystal structure of HNO₃. H4 and H5: s.o.f. 0.5.
