

STRUCTURAL
CHEMISTRY

Volume 72 (2016)

Supporting information for article:

**The anti-tumour drug 7-ethyl-10-hydroxycamptothecin monohydrate
and its solid-state hydrolysis mechanism on heating**

**Md. Ashraf Ali, Shuji Noguchi, Miteki Watanabe, Yasunori Iwao and
Shigeru Itai**

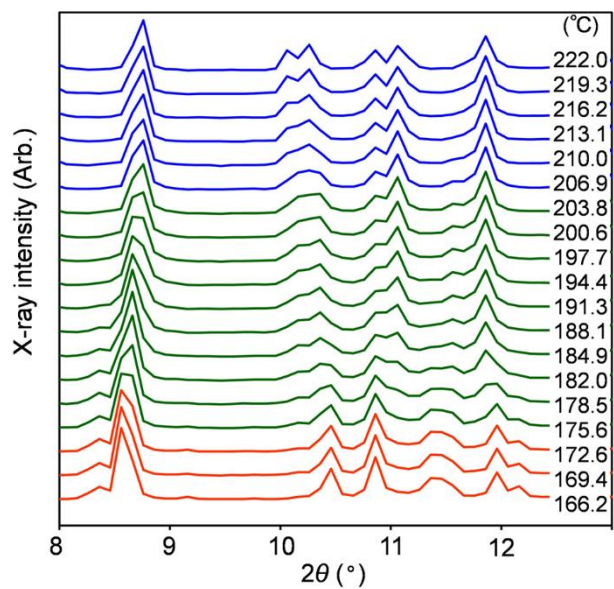

Fig. S1. Enlarged PXRD profiles of SN-38 monohydrate at a 2θ value of around 10.1° on heating.
