Supporting information for article:

Effect of pH on the charge-assisted hydrogen-bonded assembly of the anionic $[\text{Cu}(\text{oxalate})_2]^{2-}$ building unit and N,N' -ditopic cations

Fatima Klongdee, Jausup Boonmak and Sujitra Youngme

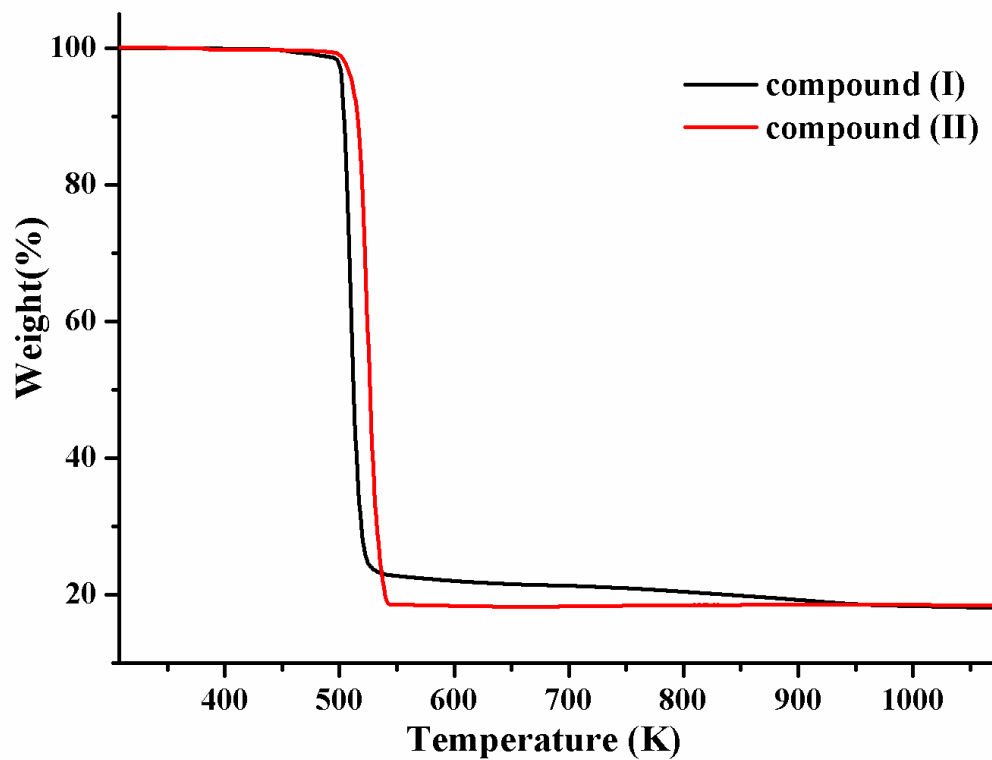

Fig. S1. Thermogravimetric analysis (TGA) of (I) and (II) was performed under an N₂ atmosphere in the temperature range 308-1073 K. The TGA curves show that (I) and (II) are thermally stable up to 490 and 500 K, respectively.

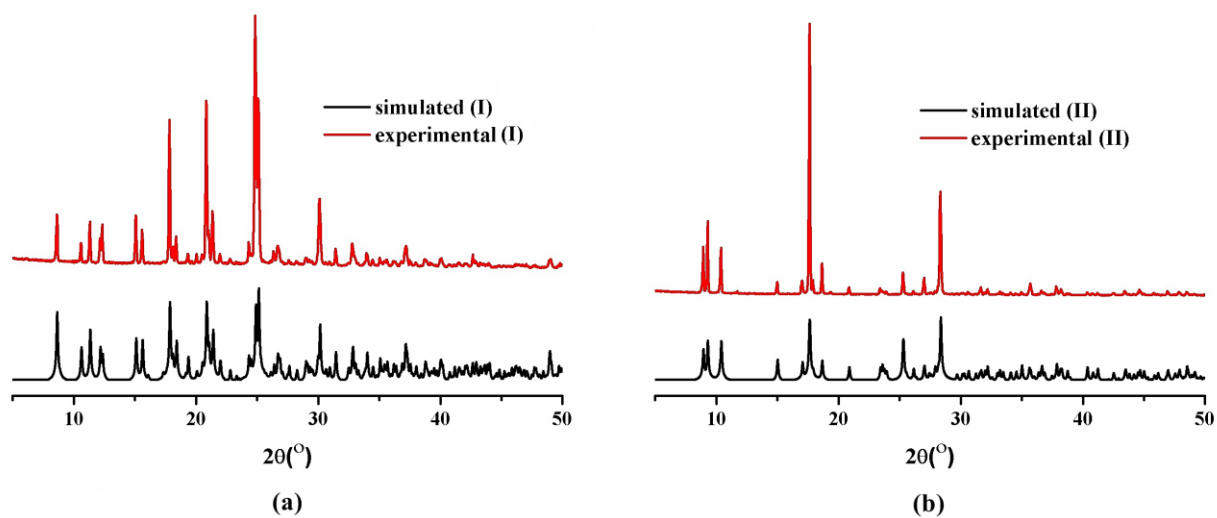

Fig. S2. The X-ray powder diffraction (PXRD) patterns for (I) and (II).
