

STRUCTURAL  
CHEMISTRY

**Volume 80 (2024)**

**Supporting information for article:**

**Using synchrotron high-resolution powder X-ray diffraction for the structure determination of a new cocrystal formed by two active principle ingredients**

**Mathieu Guerain, Natalia Correia, Luisa Roca-Paixão, Hubert Chevreau and Frederic Affouard**

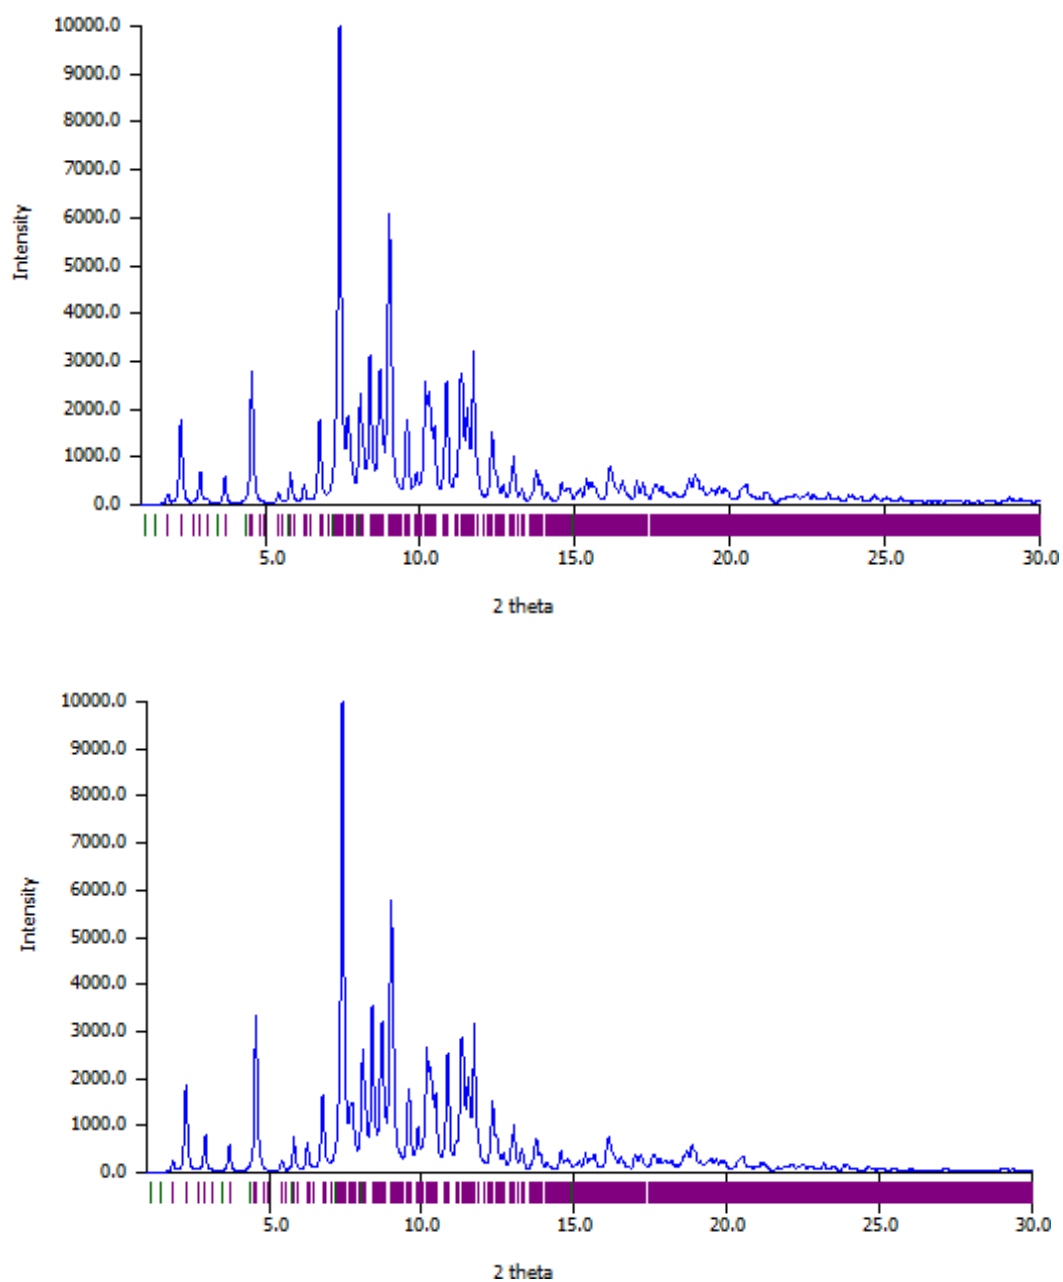

Figure S1 : X-Ray diagram obtained from the structural resolution of the co-crystal and Rietveld Refinement (up) and calculated X-Ray diagram obtained by DFT calculations (down)

Figure S2 : Visualization of the cocrystal structure and projection of the unit cell along the [001] direction for the structure obtained after Rietveld Refinement (up) and DFT calculation (down)

Figure S3 : Visualization of the cocrystal structure and projection of the unit cell along the [001]. Up : Only the C16—C17 and C30—C31 bonds are labelled. Down : All atoms are labelled.

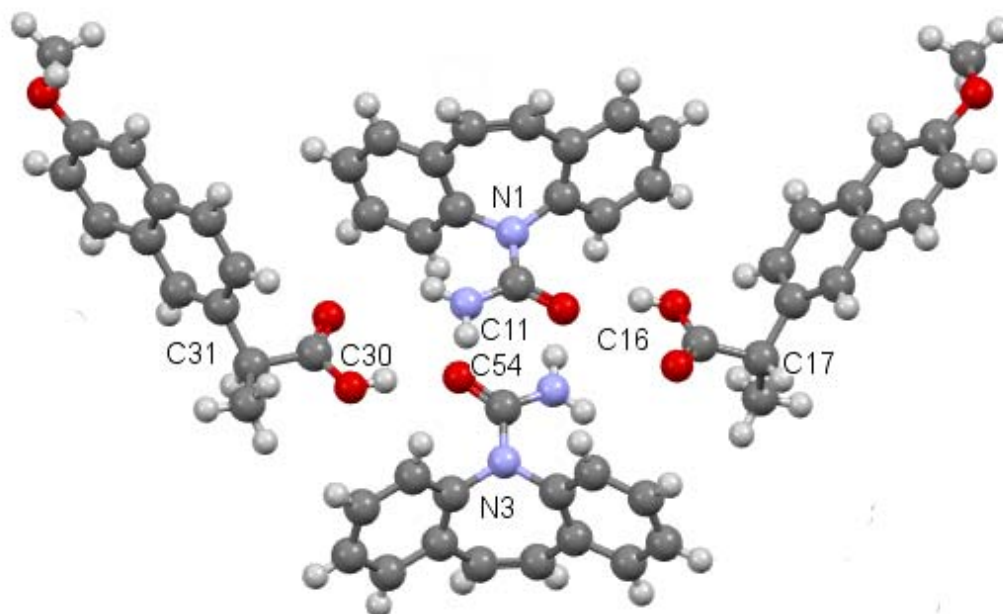

Figure S4 : Magnification of the CBZ and S-NAP molecules with the C16-C17 and C30-C31 bonds labelled.
