Supporting information for article:

Natural and non-natural amino-acid side-chain substitutions: affinity and diffraction studies of mediotope–Fab complexes

Krzysztof P. Bzymek, Kendra A. Avery, Yuelong Ma, David A. Horne and John C. Williams

Figure S1 SPR sensograms of cetuximab – meditope variant interactions at 25°C.

Figure S2 Composite omit map generated in Phenix (Adams *et al.*, 2010) for 2-bromophenylalanine mediotope variant and contoured at $\sigma=1.0$. Only a section of the map is shown (in blue).

Figure S3 Composite omit map generated in Phenix (Adams *et al.*, 2010) for F3H mediotope variant and contoured at $\sigma=1.0$. Only a section of the map is shown (in blue).
