Volume 75 (2019)

Supporting information for article:

**The structure of bovine β -lactoglobulin in crystals grown at pH 3.8
exhibiting novel threefold twinning**

Todd O. Yeates and Alexander McPherson

Table S1 Superposition of Molecules upon One Another – Main Chain Atoms

| Superposition | Mean dev. Å | Rms dev. Å | Max. dev. Å |
|---------------|-------------|------------|-------------|
| A on B | 0.195 | 0.324 | 3.42 |
| A on C | 0.177 | 0.322 | 4.41 |
| B on C | 0.212 | 0.534 | 7.86 |
