

STRUCTURAL BIOLOGY  
COMMUNICATIONS

**Volume 79 (2023)**

**Supporting information for article:**

**The crystal structure of the human smacovirus 1 Rep domain**

**Lidia K. Limón, Ke Shi, Amy Dao, Jacob Rugloski, Cassidy J. Tompkins, Hideki Aihara, Wendy R. Gordon and Robert L. Evans**

**Figure S1** The molecules in panels A, B, and C are all being viewed from the same orientation. Panel A is the structure of the WDV Rep in the holo state with Mn<sup>2+</sup> and ssDNA (PDB: 6WE0). Panel B shows the structure of the HSV1 Rep in the apo state (PDB: 8FR5). Panel C shows the 2Fo-Fc electron density (RMSD of 1.51) for the HSV1 Rep, supporting the absence of a Mn<sup>2+</sup> and ssDNA.
