BIOLOGY

**Volume 72 (2016)**

**Supporting information for article:**

**Ultrahigh-resolution centrosymmetric crystal structure of Z-DNA  
reveals massive presence of alternate conformations**

**Pawel Drozdal, Mirosław Gilski and Mariusz Jaskolski**

**Fig. S1.** Crystal packing of the two centrosymmetric Z-DNA structures, described in the space groups *P*-1 (PDB 1vtu) and *C*2/*c* (this work); **(a, b)** viewed down the *a* axis, **(c, d)** viewed down the *b* axis, **(e, f)** viewed down the *c* axis. The D-duplexes are in red, the L-duplexes in blue.
