**Figure S9.** Diagnostic search sequence for *AtWR1* 3' end. **A)** The flanking sequence upstream from the last intron which is spliced out in *AtWR1* splice form 1 was chosen as a diagnostic search sequence for the 3' end splice form search. **B)** Position of the diagnostic search sequence for *WR1* 3' end is highlighted by red boxes in alignment of predicted partial cDNAs of three *AtWR1* alternative splice forms.
