

Table S5. Summary of additional variables included in the meta-analysis. Q = Q-test for heterogeneity (including P value); ES = effect size point estimate; SE = standard error; Z = two-tail Z-test. Categorical moderators are analyzed using mixed effect models.

Moderator (Q, P)	ES	SE	Z	P
<i>Ecological region (41.91, 0.0001)</i>				
Aegean & West Turkey sclerophyllous and mixed forest	-2.9187	1.0089	-2.8930	0.0038
Corsican montane broadleaf and mixed forests	1.7917	0.9001	1.9906	0.0465
