

Supplementary Figure

S2. Flow cytometry gating strategy for CD8⁺ and CD4⁺ CD8⁺ DP transitional memory cells as well as CD8⁺ and CD4⁺ CD8⁺ DP PD-1⁺ cells. Representative gating of T cell subsets in whole blood. Excision of duplets (a singlet gate) was followed by gating on lymphocytes and subsequent gating on CD3⁺ T cells. T cells were further divided into CD4⁺, CD8⁺ and CD4⁺ CD8⁺ DP cells. CD8⁺ and CD4⁺ CD8⁺ DP transitional memory cells were identified by gating on CD197⁻ CD45RA⁻ CD28⁻ CD27⁺ cells.
