## **TREND Statement Checklist**

Paper	Item	Descriptor		Reported?	
Section/ Topic	No			Pg#	
Title and Abst	ract				
Title and	1	Information on how unit were allocated to interventions	h.a.		
Abstract		Structured abstract recommended	V	2	
		Information on target population or study sample	V	2	
Introduction					
Background	2	Scientific background and explanation of rationale	V	3-4	
		Theories used in designing behavioral interventions	V	3-4	
Methods					
Participants	3	Eligibility criteria for participants, including criteria at different levels in	l a u	1	
		recruitment/sampling plan (e.g., cities, clinics, subjects)	V	6	
		Method of recruitment (e.g., referral, self-selection), including the			
		sampling method if a systematic sampling plan was implemented	n.a.		
		Recruitment setting	h.a.		
		Settings and locations where the data were collected	4.9		
Interventions	4	Details of the interventions intended for each study condition and how and when they were actually administered, specifically including:	V	9	
		Content: what was given?	V	8-9	
		<ul> <li>Delivery method: how was the content given?</li> </ul>	V	9	
		O Unit of delivery: how were the subjects grouped during delivery?	V	4	
		Deliverer: who delivered the intervention?	n-a.		
		Setting: where was the intervention delivered?	V	9	
		<ul> <li>Exposure quantity and duration: how many sessions or episodes or</li> </ul>			
		events were intended to be delivered? How long were they intended to last?	V	9	
		<ul> <li>Time span: how long was it intended to take to deliver the intervention to each unit?</li> </ul>	V	9	
		<ul> <li>Activities to increase compliance or adherence (e.g., incentives)</li> </ul>	n.a.		
Objectives	5	Specific objectives and hypotheses	V	3	
Outcomes	6	Clearly defined primary and secondary outcome measures	V	8	
		<ul> <li>Methods used to collect data and any methods used to enhance the quality of measurements</li> </ul>	V	7-14	
		<ul> <li>Information on validated instruments such as psychometric and biometric properties</li> </ul>	V	7-14	
Sample Size	7	How sample size was determined and, when applicable, explanation of any interim analyses and stopping rules	V	4-6	
Assignment	8	Unit of assignment (the unit being assigned to study condition, e.g.,			
Method		individual, group, community)	V	4-6	
		Method used to assign units to study conditions, including details of any restriction (e.g., blocking, stratification, minimization)	V	4-6	
		<ul> <li>Inclusion of aspects employed to help minimize potential bias induced due to non-randomization (e.g., matching)</li> </ul>	V	4-6	

## **TREND Statement Checklist**

	Whether or not participants, those administering the interventions, and		T
(masking)	those assessing the outcomes were blinded to study condition assignment, if so, statement regarding how the blinding was accomplished and how it was assessed.	;	
		V	6
Unit of Analysis 10	<ul> <li>Description of the smallest unit that is being analyzed to assess intervention effects (e.g., individual, group, or community)</li> <li>If the unit of analysis differs from the unit of assignment, the analytical</li> </ul>	V	4-6
	method used to account for this (e.g., adjusting the standard error estimates by the design effect or using multilevel analysis)	V	4-6
Statistical 11 Methods	<ul> <li>Statistical methods used to compare study groups for primary methods outcome(s), including complex methods of correlated data</li> </ul>	V	8,1.
	Statistical methods used for additional analyses, such as a subgroup analyses and adjusted analysis	n.a	,
	Methods for imputing missing data, if used     Statistical software or programs used	V	14
P 1	Statistical software or programs used	V	10,1
Results Participant flow 12	Flow of participants through each store of the store	_	
Tartelpant now 12	assignment, allocation, and intervention exposure, follow-up, analysis (a diagram is strongly recommended)	V	4-6
	<ul> <li>Enrollment: the numbers of participants screened for eligibility, found to be eligible or not eligible, declined to be enrolled, and enrolled in the study</li> </ul>	V	4-6
	<ul> <li>Assignment: the numbers of participants assigned to a study condition</li> </ul>	V	4-6
	<ul> <li>Allocation and intervention exposure: the number of participants assigned to each study condition and the number of participants who received each intervention</li> </ul>	V	4-6
	<ul> <li>Follow-up: the number of participants who completed the follow-up or did not complete the follow-up (i.e., lost to follow-up), by study condition</li> </ul>	V	4-6
	<ul> <li>Analysis: the number of participants included in or excluded from the main analysis, by study condition</li> </ul>	V	4-6
	<ul> <li>Description of protocol deviations from study as planned, along with reasons</li> </ul>	V	4-6
Recruitment 13	Dates defining the periods of recruitment and follow-up	V	6
Baseline Data 14	Baseline demographic and clinical characteristics of participants in each study condition	V	5-6
	<ul> <li>Baseline characteristics for each study condition relevant to specific disease prevention research</li> <li>Baseline comparisons of those lost to follow as a set to fo</li></ul>	V	14
	and by study condition	n.a.	
	<ul> <li>Comparison between study population at baseline and target population of interest</li> </ul>	hra.	
Baseline 15	Data on study group equivalence at baseline and statistical methods used		

## **TREND Statement Checklist**

	T			
Numbers analyzed	16	<ul> <li>Number of participants (denominator) included in each analysis for each study condition, particularly when the denominators change for different outcomes; statement of the results in absolute numbers when feasible</li> </ul>	V	13
		<ul> <li>Indication of whether the analysis strategy was "intention to treat" or, if not, description of how non-compliers were treated in the analyses</li> </ul>	n-a	
Outcomes and estimation	17	<ul> <li>For each primary and secondary outcome, a summary of results for each estimation study condition, and the estimated effect size and a confidence interval to indicate the precision</li> </ul>		14-
		Inclusion of null and negative findings	n.a	-
		<ul> <li>Inclusion of results from testing pre-specified causal pathways through which the intervention was intended to operate, if any</li> </ul>	n.a	
Ancillary analyses	18	<ul> <li>Summary of other analyses performed, including subgroup or restricted analyses, indicating which are pre-specified or exploratory</li> </ul>	V	13
Adverse events	19	<ul> <li>Summary of all important adverse events or unintended effects in each study condition (including summary measures, effect size estimates, and confidence intervals)</li> </ul>	n_a.	
DISCUSSION				1
Interpretation	20	<ul> <li>Interpretation of the results, taking into account study hypotheses, sources of potential bias, imprecision of measures, multiplicative analyses, and other limitations or weaknesses of the study</li> </ul>	V	22-
		<ul> <li>Discussion of results taking into account the mechanism by which the intervention was intended to work (causal pathways) or alternative mechanisms or explanations</li> </ul>	ν	22-
		<ul> <li>Discussion of the success of and barriers to implementing the intervention, fidelity of implementation</li> </ul>	V	22
Generalizability	21	Discussion of research, programmatic, or policy implications	V	22-2
oeneralizability	21	<ul> <li>Generalizability (external validity) of the trial findings, taking into account the study population, the characteristics of the intervention, length of follow-up, incentives, compliance rates, specific sites/settings involved in the study, and other contexts.</li> </ul>		22-
Overall	22	<ul> <li>the study, and other contextual issues</li> <li>General interpretation of the results in the context of current evidence</li> </ul>	V	20
Evidence		and current theory	V	26
