Dvornyicsenko, N. 2017, *The specific aspects of privileges and immunities of diplomatic agents in international law: theory and practice: monograph*, B&M Publishing, San Francisco, California. 384 pp.

The present monograph is a comparative study of the concept of diplomatic privileges and immunities, with regard to the legal literature and the corresponding international legislation, extended to writings of legal scholars, representatives of both continental and common law. The relation of diplomatic agents to privileges and immunities, accorded to them, remains one of the most problematic matters of diplomacy law. In this way, addressing the aspects of the investigated topic, including examination of the current state of affairs, regarding diplomatic privileges and immunities, revising the sources of diplomacy law, essential relevant concepts, instruments of enforcement of diplomatic privileges and immunities, along with means of protection of diplomats, was supported by a wide-ranging spectrum of bibliography.

The materials examined, include theoretical writings, historical resources, also various legal sources, official documents, academic journals and relevant academic publications, policy statements, scholarly articles, website materials, internet publications, media releases, originally issued in English, Hungarian, Russian, Ukrainian, Belorussian, French and German.

Consideration of issues, related to the subject of diplomatic privileges and immunities, has both theoretical and practical significance. The suggestions and results, obtained in the course of research, could be used in the further improvement of the various issues and problems, concerning personal privileges and immunities of diplomatic agents. The present study may be of interest for subsequent researchers in the field of diplomacy, as well as for current diplomatic servants. Successively, the monograph is assigned to students and university professors, postgraduates, faculty of advanced professional training, researchers, legal practitioners, career diplomats and other specialists and members of the state apparatus, as well as to all readers, interested in in questions of diplomacy law.
