Abstracts

The impact of school libraries Environment on students is not clear. Students think that the amount of happiness is statistically significant. On the other hand, when time goes on, the students who participate in the examination, schools think that reading is more useful than the students who visit the school. While reading, the School Library's statistics did not have a significant impact. However, the school library program is not implemented in the best form, which may be affected by the study results. Family reading is considered as an important precedent for reading atmospheric and reading behavior, emphasizing the importance of parents as a school partner for schooling.

KEYWORDS: High School Library, Reading Environment, Reading, Students, ICT And Importance

INTRODUCTION

The school library should be exciting and welcoming and identifiably different from classrooms. As a multimedia interactive learning environment, it motivates pupils to explore resources for curriculum related work and their personal interests and stimulates creativity. The library should be the heart of the school where frequent and flexible access is encouraged. It should be aesthetically pleasing and have a barrier-free learning environment that encourages the enjoyment and excitement of reading. A vibrant program will encourage students to visit the library, to become lifelong library users, and to love books and reading.

Librarians of the 21st century are educators in every sense of the word. Whether instruction is a collaborative effort with other teachers or on an as-needed basis, librarians – like their classroom counterparts – must be prepared to develop instructional plans that meet the needs of the learning community they serve. These lesson plans must be framed according to current best practices in teaching and learning and should include the use of technology in teaching as a necessary element in meeting the needs of the 21st-century digital learner.

LITERATURE REVIEW

Piracha (2006), pointed out that the importance of the school library is unlikely Underestimated. He said the library was a list of written, printed and collector Drawing materials for evaluation and discussion. The function of the school was given Students need to study knowledge. This is the driving force for overall growth Create students who pass a successful career. Step National Education Policy (1998-2010) schools have 20% libraries Modesty. Total libraries are 15.5 million, with 15,000 libraries the basic school library is well equipped with furniture 30 and all books are equipped Community sample schools compare with the government. Only one girl is in primary school some books are children. In India, 65% live in rural areas Community facilities cannot provide library facilities. The

library plays an important role Improve reading habits. This may encourage people to develop a sustainable intellectual growth Social and economic development is rapid. In addition, the authors (in their view A detailed teaching tool requires work.

Mehmood (2006), the teaching tool has large steel box 102 different products. These are called learning aids. This will cover all elementary school courses Lessons. These subjects include science, mathematics, social studies and Urdu languages. These tools and the tool allow teachers to come up with low cost / no cost material ideas. From 1975 to 1977, there were over 65,000 schools in the country UNICEF with financial aid. It's affordable at school. Obviously, there are all primary and primary schools in Punjab In addition to education by teacher education development, the use of teaching kiosks can be encouraged by non-performing activities.

Singh (2004) emphasized that in an academic institution, the healthier environment is very highly important educational process is important. Excellent environmental boosts Teachers must make every effort to teach and motivate students' curiosity their study. Due to the healthy environment, the quality of education has improved at school. Ali (2006) editor's approach, including organization the school offers a bright spot for educational achievement Student performance. The results reflect a good school environment Positive effectiveness of pupil's performance. Shukla (2003) says three factors Teachers, students, and physical attributes are very important for the best teaching Situation. In addition, the environment plays an important role in the educational environment Focus on student development arrangements. The school should be the environment outside the school will reflect the real atmosphere. Miola (2005) points out, School and life are inseparable. Education includes handling Experience is an experienced organization based on the school's focus you cannot give the children anything where they cannot afford in other parts of the world, it does not have a proper need at the right time. Children always learn to Contact the environment. The family and school environment are very bad to Create a child's personality. Devi (2003) "Family" Environment "is similar to parenting behavior This includes the quality of human relationships in the child's viewpoint Family belief and growth.

SCHOOL ENVIRONMENT

The environment plays an important role in the context of teaching. This School management is responsible for creating a necessary environment such a teaching process. Researchers have mentioned that school the student is considered a place for teaching, teachers, parents and all participants Assistant School Office (Smith et al., 2003). Supported by the Government of India (2003 A) Communities, local organizations, NGOs and public sector Construction, lack of, procurement and other issues are considered necessary Progress is a school and a good teaching environment. These character Companies are required to create new women's schools in rural areas.

GENERAL ACTIVITIES

A photograph showing a group of students sitting at a long table in a library, reading books. A teacher is standing at the end of the table, supervising. The room is filled with bookshelves.

DISCUSSION AND CONCLUSIONS

editor@tjprc.org

facing many problems like a fulltime librarian, and library staffs, book collections, journals, e-resources and furniture as well as a separate building. Readings are many advantages like increased in knowledge of school students, helped in edutainment; strengthen in mind power, the book reading also helped in co-curriculum as well as extra co-curriculum activities in the daily life of school students. A curriculum is an integral part of school life Now a day's the school library culture or reading environment is not part of our nation or Maharashtra state.

Reading environments are helpful in the implementation of good thinking and activities of school students. Also helps with stage daring in time of speech competitions as well as a cultural program in school. Many social scientists are strongly agreed due to the reading of books decreased crime in society. So reading of books or reading environment is very helpful for all as well as a school student, school libraries are must in our society.
