Alaska

State Outlook

As Alaska's population ages, older residents will play a critical role in the state's economic recovery and growth. Even after accounting for the impact of COVID-19, Alaska's aging population will continue to make economic and social contributions that benefit people of all ages, and the growth of this age group will fuel innovation and new market solutions. Policymakers, business leaders, and elected officials must ensure programs and policies are in place to support and grow this economic engine.

Key findings:

Alaska's 50-plus population creates outside economic impact and will drive economic growth for the next 30 years. In 2018, the 50-plus population accounted for 31% of Alaska's population, yet contributed 37%—or \$23 billion—of the state's total GDP. Their activities also supported 184,000 jobs and generated \$14 billion in wages and salaries. Their contribution to GDP is forecast to reach \$63 billion in 2050—over 37% of the state's projected GDP—when people 50-plus will account for 35% of the population.

The purchasing power of Alaska's 50-plus population will generate tax revenue for decades to come. In 2018, the market activities of people 50-plus supported \$1.1 billion in state and local taxes (34% of Alaska's total). That figure will triple to \$3.5 billion by 2050.

Where do people age 50-plus live?

(%) share by county in 2018

Overview: Economic impact of the 50-plus population

	2018		2050	
	Impact	% of total	Impact	% of total
State GDP	\$23 billion	37	\$63 billion	37
Jobs	184,000	40	184,000	40
Wages and salaries	\$14 billion	43	\$35 billion	44
State and local taxes	\$1.1 billion	34	\$3.5 billion	36

"% of total" refers to 50-plus impact as a percentage of each category.

The 50-plus cohort will grow from 31% to 35% of the population by 2050

Alaska

As a major source of Alaska's consumer spending, 50-plus households will drive economic growth across sectors

Unpaid contributions

Beyond their economic contributions, the 50-plus cohort also spends time engaging in vital activities like volunteering and caregiving for children and adults. The 50-plus population in Alaska contributed \$252 million in volunteering activities and \$1.9 billion in unpaid caregiving in 2018, with the average person spending 52 hours on volunteering and over 590 hours on caregiving over the entire year.

The 50-plus population provides \$2 billion in unpaid contributions

Value of unpaid activities, 2018 (\$ billion)
(Values may not sum due to rounding)

■ Under-50 ■ 50-plus

50-plus households accounted for 52 cents of every dollar spent in Alaska in 2018—this will grow to 58 cents (58%) by 2050

The market activities of Alaska's 50-plus population create jobs, wages, and salaries

In 2030, the 50-plus population's activities will support 188,000 jobs in Alaska, driving employment growth across all age groups and industries. Most of these jobs will be created in government; health services; wholesale and retail trade; and leisure and hospitality (see chart on right).

Labor force: People age 50-plus will continue to play a significant role as part of Alaska's workforce: by 2030, 50-plus workers in the state are projected to number 115,000, representing 33% of the state's total labor force.

Which sectors will see biggest jobs impact in 2030?

Number of jobs supported by 50-plus activities and % of sector

Methodology: This state profile details the contribution of the 50-plus population, both in-state and through interstate commerce, to Alaska's economy. The overall impact includes the direct effects of their spending, work contributions, and taxes paid. It also includes the ripple effects this generates—via business supply chains and through the wages and spending of other workers. All forecasts account for the effects of COVID-19 on U.S. demographic and economic projections. These forecasts were informed by data from the Centers for Disease Control and Prevention, the Bureau of Economic Analysis, Bureau of Labor Statistics, and The Economist Intelligence Unit's macroeconomic forecasts. For further details see: <http://www.aarp.org/longevity>.
