South Carolina

State Outlook

As South Carolina's population ages, older residents will play a critical role in the state's economic recovery and growth. Even after accounting for the impact of COVID-19, South Carolina's aging population will continue to make economic and social contributions that benefit people of all ages, and the growth of this age group will fuel innovation and new market solutions. Policymakers, business leaders, and elected officials must ensure programs and policies are in place to support and grow this economic engine.

Key findings:

South Carolina's 50-plus population creates outsized economic impact and will drive economic growth for the next 30 years.

In 2018, the 50-plus population accounted for 37% of South Carolina's population, yet contributed 42%—or \$103 billion—of the state's total GDP. Their activities also supported 1.3 million jobs and generated \$68 billion in wages and salaries. Their contribution to GDP is forecast to reach \$331 billion in 2050—over 46% of the state's projected GDP—when people 50-plus will account for 41% of the population.

The purchasing power of South Carolina's 50-plus population will generate tax revenue for decades to come. In 2018, the market activities of people 50-plus supported \$7.3 billion in state and local taxes (39% of South Carolina's total). That figure will nearly quadruple to \$27 billion by 2050.

Overview: Economic impact of the 50-plus population

	2018		2050	
	Impact	% of total	Impact	% of total
State GDP	\$103 billion	42	\$331 billion	46
Jobs	1.3 million	45	1.5 million	48
Wages and salaries	\$68 billion	47	\$204 billion	51
State and local taxes	\$7.3 billion	39	\$27.3 billion	43

"% of total" refers to 50-plus impact as a percentage of each category.

The 50-plus cohort will grow from 37% to 41% of the population by 2050

South Carolina

As a major source of South Carolina's consumer spending, 50-plus households will drive economic growth across sectors

Spending of the 50-plus population by product (\$ billion)

Please see Appendix 4 at <https://doi.org/10.26419/int.00042.003> for a complete description of each consumption product category.
Note: Education services include spending on education across all members living in the same household (consumption expenditures are recorded at the household level).

Unpaid contributions

Beyond their economic contributions, the 50-plus cohort also spends time engaging in vital activities like volunteering and caregiving for children and adults. The 50-plus population in South Carolina contributed \$2.5 billion in volunteering activities and \$7.4 billion in unpaid caregiving in 2018, with the average person spending 70 hours on volunteering and over 350 hours on caregiving over the entire year.

The 50-plus population provides \$10 billion in unpaid contributions

Value of unpaid activities, 2018 (\$ billion)
(Values may not sum due to rounding)

50-plus households accounted for 58 cents of every dollar spent in South Carolina in 2018—this will grow to 61 cents (61%) by 2050

50-plus share of every dollar spent, for select categories (%)

The market activities of South Carolina's 50-plus population create jobs, wages, and salaries

In 2030, the 50-plus population's activities will support 1.3 million jobs in South Carolina, driving employment growth across all age groups and industries. Most of these jobs will be created in wholesale and retail trade; professional and business services; government; and health services (see chart on right).

Labor force: People age 50-plus will continue to play a significant role as part of South Carolina's workforce: by 2030, 793,000 workers in the state are projected to number 793,000, representing 31% of the state's total labor force.

Which sectors will see biggest jobs impact in 2030?

Number of jobs supported by 50-plus activities and % of sector

Methodology: This state profile details the contribution of the 50-plus population, both in-state and through interstate commerce, to South Carolina's economy. The overall impact includes the direct effects of their spending, work contributions, and taxes paid. It also includes the ripple effects this generates—via business supply chains and through the wages and spending of other workers. All forecasts account for the effects of COVID-19 on U.S. demographic and economic projections. These forecasts were informed by data from the Centers for Disease Control and Prevention, the Bureau of Economic Analysis, Bureau of Labor Statistics, and The Economist Intelligence Unit's macroeconomic forecasts. For further details see: <http://www.aarp.org/longevity>.
