Fact Sheet

Lower-Cost Health Coverage Helps Pre-Medicare Older Adults in West Virginia

Olivia Dean and Jane Sung

The American Rescue Plan Act (ARPA)—signed into law in March 2021—increased the availability of affordable health coverage for West Virginians ages 50 to 64 in years 2021 and 2022. The law expanded tax credits that help consumers pay premiums for health coverage purchased through Health Insurance Marketplaces, which are shopping and enrollment hubs created by the Affordable Care Act (ACA). Prior to this expansion of financial assistance, many older West Virginians faced high premium costs that made health coverage unaffordable.

Many West Virginians could be helped by the ARPA's expanded premium tax credits.

11,407

older adults in West Virginia purchase coverage on their own in the nongroup health insurance market.

While most adults ages 50 to 64 have health insurance through an employer or public program (such as Medicaid), 11,407 older West Virginians purchased coverage on their own in the nongroup (individual) health insurance market in 2019. 9,529 enrolled in nongroup coverage through the state's Marketplace, while the rest purchased coverage off-Marketplace (through an agent/broker or directly from an insurer).

27%

of older nongroup enrollees did not get financial help with their premium costs before the ARPA.

Under the ACA, federal subsidies that can be used to pay for premiums and out-of-pocket costs are available to people with certain incomes who enroll through the Marketplace. In 2019, 73% of older nongroup enrollees in West Virginia received federal subsidies to help with premium costs, while 27% did not.

14%

of older nongroup enrollees delayed medical care due to cost before the ARPA.

Prior to the ARPA, many older nongroup enrollees in West Virginia faced affordability challenges. In 2019, 19% of older nongroup enrollees in West Virginia reported issues paying medical bills, and 14% delayed medical care due to cost in the previous 12 months.

\$12,204

was the average unsubsidized premium for older Marketplace enrollees before the ARPA.

Prior to the ARPA, people with incomes above 400% of the Federal Poverty Level were not eligible for any financial help and had to pay their full premiums, which could be up to three times higher for older enrollees than for younger adults.

81%

of current Marketplace enrollees ages 55 to 64 are now eligible for a monthly premium of \$50 or less.*

Uninsured older adults could also significantly benefit from the new lower premiums under the ARPA. Over 60% of adults ages 55 to 64 who lack health insurance but are eligible for ACA coverage could now find a plan with a monthly premium of \$50 or less. Many are eligible for \$0 premium plans.

40,000

older adults could potentially be helped by the ARPA.

For 2021 and 2022, the ARPA expanded eligibility for federal premium subsidies to individuals with incomes above 400% of the Federal Poverty Level and increased the subsidies for those already eligible. Many of the 28,814 (or 8% of) older West Virginians who remain uninsured plus the 11,407 (or 3% of) older West Virginians who are already enrolled in the nongroup market may be able to find more affordable coverage under the law. Among West Virginians ages 50 to 64 in 2019, 8% of Black adults and 8% of White adults were uninsured.
