Launching of Journal of Science with Technological Applications – A tool for the sharing of scientific information

I am very excited by the launching of Journal of Science with Technological Applications, a new journal for divulgation of scientific knowledge and a new space for the analysis of different topics, in different fields. Today, we start with articles in chemistry, microbiology and engineering, but we are expecting many more disciplines, many more articles around the world and, thus, to contribute with the free divulgation of scientific results.

Technological Applications

MIND TECH

Our contribution is to information share, to ease to access to that information, and to help to discussion of different topics. In my opinion, JSTA must be seen as a tool for the building of knowledge.

Thanks for your contributions.
