United States Department of Commerce
Technology Administration
National Institute of Standards and Technology

The National Institute of Standards and Technology also participated in 1985 for Congress for Social Mobility in the development of technology... needed to improve product quality, promote new manufacturing processes to ensure product reliability... and to facilitate rapid commercialization of products based on new scientific discoveries.

NIST, originally founded as the National Bureau of Standards in 1901 and redesignated the U.S. Institute of Standards and Technology in 1980, provides the nation with the technical infrastructure, standards, and research in the physical sciences and engineering, and develops measurement techniques, methods, standards, and related services. The Institute also generates and disseminates technical information, and research facilities are located at Gaithersburg, MD 20899, and at Boulder, CO 80506. Administrative operations and their principal activities are listed below. For more information, contact the Public Inquiries Desk, 301 975-5018.

As an agency of the U.S. Commerce Department, the Technology Administration (TSA) coordinates and guides research in the physical sciences and engineering, and develops measurement techniques, methods, standards, and related services. The Institute also generates and disseminates technical information, and research facilities are located at Gaithersburg, MD 20899, and at Boulder, CO 80506. Administrative operations and their principal activities are listed below. For more information, contact the Public Inquiries Desk, 301 975-5018.

INTRODUCTION

NIST was created by the Omnibus Trade and Competitiveness Act signed by President Reagan in August 1988. NIST's predecessor agency, the National Bureau of Standards, was originally established in 1901 to serve as the nation's science and engineering laboratory for measurement technology and research standards. NIST has a broadened role that includes the traditional functions of providing the measurements, calibrations, data, and quality assurance support that are vital to U.S. commerce and industry, together with programs to support the aggressive adaptation of new technologies to American industry.

Because currency of information is so critical to ongoing research, it is essential that there be a solid technical information support facility. The NIST Research Information (RIC) exists to provide this technical information base by serving as a source for both current and retrospective information and data in the fields of activity at NIST.

The areas of research at NIST are constantly changing and the scope of the Research Information Center's collections shift to accommodate these changes. While the core of the collections remains chemistry, computer technology, engineering, mathematics, materials science and physics, other interdisciplinary areas of technology are included.

This edition of NIST Serial Holdings contains not only journals currently received, but also other serials. The majority of the titles listed are held in the RIC collections; however, holdings of the Fire Research Information Services (FRIS) are also included and these are identified by FRIS on the line above the holdings statement.

We urge you to read "Guidelines for Use." You are invited to send your comments, suggestions, and corrections to Susan Sanders, Serials Librarian. Mrs. Sanders can be reached at (301) 975-3772.

GUIDELINES FOR USE

Contents and Arrangement

NIST Serial Holdings includes periodicals, journals, annuals, memoirs, proceedings and transactions of societies, "advances in," "progresses in," and selected conferences and monographs in the collections of the NIST Research Information Center (RIC) and the Fire Research Information Services (FRIS).

Lines below the titles indicate what years and volumes are held and the assigned call number for each title.

The list is arranged alphabetically by title. Titles are as they appear on each serial except for:

1. Articles such as **THE**, **DIE**, or **LA** at the beginning of a title. These are omitted.
2. Proceedings, symposia, transactions, reports, etc., of associations and societies may be listed under the sponsoring agency, for example:
3. Letters are substituted for diacritical marks, such as the German **umlaut** ("). Thus, **FÜR** becomes **FUER**.

Location of Material

Diagrams of the three floors of the RIC will be found on pages v-vii. The locations for both bound and unbound journals and special collections are indicated. Consult the Table on page viii for interpretation of location information given in the list.

Generally, the most recent years of a journal are unbound and shelved alphabetically by title. These unbound journals are located:

1. In the unbound journal section along the main reading area on the first floor.
2. In the Selected Periodical section. This section, located near the photocopy room on the first floor, houses approximately 90 journals that are of high interest to many NIST staff members. Science is one such title. Only the current year of each title will be found here; earlier years are shelved with the bound volumes. These titles are indicated in the list by **SEL PER**.
3. In one of the RIC's special collections, such as Intergovernmental Affairs. Location codes for these journals are given in the list.

Location information for all journals currently received is posted at the south end of each of the unbound journal stacks.

Earlier years of journals are usually bound and shelved by call number; all years of serials are shelved by call number with the bound volumes. The majority of bound journals and serials are located on the main and mezzanine floors. However, some earlier and less used volumes are located in the basement in the Non-Current Collection (NCC). Location codes for these are given in the list.

Should you experience any difficulty in locating what you need, please ask an Information Specialist. Also inquire for any journals or serials which may have been added to the collection since publication of this edition of NIST Serial Holdings. Most recent additions can be found on the New Title Shelf near the Photocopy Room on the first floor.

The most current issues of the Selected Periodicals do not circulate; all other journals, bound and unbound, may be borrowed by NIST personnel. Non-NIST personnel should contact the RIC ILL office for borrowing information.

INTERGOVERNMENTAL AFFAIRS COLLECTION

The Intergovernmental Affairs Collection (IGA) provides information about the work of Congress, the Executive agencies and regulatory and administrative actions relevant to NIST activities. It is located in the NIST Research Information Center adjacent to the study area on the mezzanine (see diagram on page vii). IGA holdings are included in the Serials list.

Mezzanine

ABBREVIATIONS, SYMBOLS, AND LOCATION CODES USED

INC.	Holdings are incomplete. See LIBRO or card catalog to determine missing items.	M	Some or all holdings are in microform. Filed alphabetically in cabinets at the rear of the RIC on the first floor.
CD-ROM	Abstracts and some full-text are available for searching at the CD-ROM Workstations. Ask an Information Specialist for assistance.	M/CPM	Earlier microform holdings are on microfilm (filed alphabetically by title); later holdings are on Current Physics Microfilm.
CONTINUED BY:	Refers to the later title of a publication.	NCC	Non-Current Collection located in RIC basement; shelved by call number.
CONTINUES:	Refers to the earlier title of a publication.	REF	Located in Reference Collection.
CPM	Available on Current Physics Microfilm. Filed alphabetically by title in cabinets at the rear of the RIC on the first floor. Ask RIC staff for assistance.	REF/ABSTRACTS	Located in Abstracts Collection.
FRIS	Holdings are located in Fire Research Information Services; Polymer Building, Room A252; telephone: (301) 975-6860	SELECTED VOLUMES	Check LIBRO for specific volumes held by the RIC.
IGA	Located in Intergovernmental Affairs Collection.	SEL PER	Selected Periodicals Collection. Current year in Selected Periodicals area; earlier years shelved with bound volumes, by call number.
