Replication of

Virtuous Party Linkages: Developing a Data-Based Analytical Model to Explain Voters' Attitudes towards Political Parties

Ann-Kristin Kölln, University of Gothenburg
Helene Helboe Pedersen, Aarhus University

Data

The analyses rely on original datasets collected by the project 'Identifying Political Parties' Institutional Legitimacy and its Sources' (Aarhus University Research Foundation, AUFF-E2017-7-13).

The focus group data is qualitative data collected in Denmark with 26 participants across four groups. The file Data Focus group discussions.pdf contains the transcribed discussions used for the analyses.

The survey data was also collected in Denmark with among 107 respondents. The file Data Survey.csv contains the responses used for the analyses.
