The Credibility of Party Policy Rhetoric: Survey Experimental Evidence

Replication materials

Pablo Fernandez-Vazquez[1]

R SCRIPTS

1) credibility_jop_replication_mainresults.R

Replicates the main results in the main text and the online appendix.

2) credibility_jop_replication_publicopinion.R

Replicates results on the distribution of public opinion about immigration and health care.

3) credibility_jop_short_replication_crowdcoding.R

Replicates results for the crowdsourced coding of party statements

4) credibility_jop_replication_externalvalidity.R

Replicates results that re-estimate the main model but applying weights to have the convenience samples match a representative sample (British Election Study) on key sociodemographic characteristics.

DATA

1) immigration_SurvExp.csv

Data from the Immigration survey experiment.

2) nhs_SurvExp.csv

Data from the NHS survey experiment

3) IMM_statements.csv

Data from the crowdsourced coding of immigration statements

4) NHS_statements.csv

Data from the crowdsourced coding of NHS statements
