Data files

The online data archive contains the following data sets in Stata 15 format:

- *dataset_survey_final.dta* provides data for the individual-level analysis of the paper. Together with the dofile *dofile_manuscript_final.do*, they allow to replicate the following tables:
    - Table 1 in the main text.
    - Tables B1, B2, B3, and C1 in the appendix.
    - Figure 1 in the main text.
    - Figures B1, C1, C2, C3, and C4 in the appendix.
- *dataset_district_final.dta* provides data for the district-level analysis of the paper. Together with the dofile *dofile_district_final.do*, they allow to replicate Table A1 in the appendix.

Note1: for replicating the results in Stata, the following commands have to be installed: outreg2, ciplot, and reghdfe.

Note2: Figures have been rescaled manually.
