V195 "WORD-SCORE "

Word-to-picture Score (Two Digits)

For half the Census sample, in half the PSU's, respondents were given a set of four pictures and fourteen words were read, asking the respondent to indicate which was the best picture for that word. The words and pictures came from the Ammons Quick Test,* but the procedure was altered such that the result should not be considered an application of that test. Actually, as graded in tests on school children, we took every third word up through age 12, so that many people would be expected to get them all right, and only the bottom fringe would be distinguished. (This reduces the amount of failure experience and field difficulties, we feel.) The simplest words were names of objects actually in one picture, and as the words get more difficult, their connection to a picture also becomes more indirect.

The income reported here was collected in 2013 about tax year 2012. This variable can contain negative values, indicating a net loss from a business or farm.

This variable includes Head's and Wife's/"Wife's" income from assets, earnings, and net profit from farm or business, that is, G4-G25d, G52, and G59a-G59d. All missing data are assigned.

ER58117 "HEAD AND WIFE TRANSFER INCOME-2012 "

Head's and Wife's/"Wife's" Total 2012 Transfer Income, Except Social Security

The income reported here was collected in 2013 about tax year 2012. The components of transfer income are very diverse. Because it is difficult to evaluate outliers without a case-by-case review of the interview, interviewer thumbnail comments, and prior-wave reports, analysts are urged to exclude or otherwise allow for cases in which the value is above the 99th percentile point. All missing data were assigned.

Codes

0 No transfer income in 2012

ER34201 "2013 INTERVIEW NUMBER "

2013 Interview Number (2013 ID Number)

The values for this variable represent the 2013 interview number of the family in which this individual was included in 2013. We interviewed 9,063 families in 2013.

Codes

1 - 9,107 2013 family interview number

0 Inap.: this individual was main family nonresponse by 2013 or mover-out nonresponse by 2011; from Latino sample (ER30001=7001-9308)

2013 Sequence Number

This variable provides a means of identifying an individual's status with regard to the FU at the time of the 2013 interview.

Codes

1 - 20 Individuals in the family at the time of the 2013 interview

51 - 59 Individuals in institutions at the time of the 2013 interview

71 - 80 Individuals who moved out of the FU or out of institutions and established their own households between the 2011 and 2013 interviews

ER34203 "RELATION TO HEAD 13"

2013 Relationship to Head

Note that these relationships are those to the 2011 Head for any individual whose 2013 sequence number (ER34202) is greater than 50; that is, individual has moved out of the FU. Thus, for example, if the 2011 Head is no longer present at the time of the 2013 interview, his or her relationship to Head is coded 10; the new 2013 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER34202) are coded 01.

Non-comparability Notes Appendix

F-jj Background section variable, asked only of new Heads/Wives/"Wives". Data values for cases with same Heads/Wives/"Wives" as in the previous wave have been carried forward from the time when these persons most recently became new Heads/Wives/"Wives" or when the questions were reasked of all Heads/Wives/"Wives". Some of these variables may require updating. See the User Guide or the specific variable descriptions in the codebook. Note that for 1994-1996, 1999 and 2001, data have not been brought forward for same Heads and Wives/"Wives". In 1997, the background sections were rewritten to include a number of new questions; these and many familiar items were reasked of everyone. Education, sibling information, and years worked were, however, NOT reasked. Information was not brought forward from prior waves for these variables. However, from 2003 forward, the data are complete for everyone.

F-jjj Although this variable is attached to the 1970 family data, it was generated on a 1974 family basis during processing of 1974 data. At that time, the PSID released merged cross-year family and family-individual files, and it was decided to place this series of variables (V1701-V1763) between the 1970 and 1971 family data. When we began releasing the family data as single-year files, these variables stayed with the 1970 data because of their location. This version of the index places the variables in the 1970 column because that is the family dataset to which they are physically attached, although in terms of content they refer to 1968 through 1972 and 1974 family information. The heading for each variable specifies to which wave the data item refers. Code descriptions are located in the 1974 family codebook.

F-pp These variables are coded directly from Wives'/"Wives'" questionnaires, asked in 1976 and 1985, and reported by Wives/"Wives" themselves.

I-f The 1983 and later years' codings of relationship to head are much more detailed than in previous years. We hope some day to recode relationship to head for 1968-1982 in the same detail.

I-j Categories differ; see codebook for details.

I-k Field width differs.
