READ ME (1-2014):

This document explains how to replicate the analyses in "Rewarding Bad Behavior: How Governments Respond to Terrorism in Civil War" published by Jakana Thomas in *American Journal of Political Science*.

Below the name and definition of each variable included in the *Stata* file "JThomas_AJPS.dta" is listed. Detailed information about how these variables were coded is available in both the manuscript and supplemental appendix (online). The necessary steps to replicate all of the results that appear in both the article and appendix are provided in "JThomas_AJPS.do."

When using these data, please cite the article that appears in AJPS.

Stata12 was used to conduct all statistical analyses.

Name as variable appears in Stata data file	**Variable definition/label**
1. gwnoa	Gleditsch and Ward Number
