Socioeconomic Variables

All socioeconomic variables except for 'land area by state' (LAREA) come from the World Bank data set, *A Database on Poverty and Growth in India*, prepared by Ozler, Datt and Ravallion (1996) as part of the research project on 'Poverty in India 1950-1990'.

Price indexes have been updated following Ozler et al (1996) methodology.

LAREA comes from the Registrar of General, Ministry of Home Affairs, India. It is available from the *Statistical Abstract*, published by the Central Statistical Organization, Department of Statistics, Ministry of Planning, India.
