Automakers' Short-run Responses to Changing Gasoline Prices
Ashley Langer and Nathan H. Miller
README file for data and Stata files

Note: The incentive data for this paper is proprietary data from Autodata Solutions. They can be contacted at www.autodata.net or 1-800-263-2384 for access to the underlying data.

Data files:

The only non-proprietary data used in this paper is the starting and ending model production dates. These are available in **startstop.csv**.

Do files:

merging_incentives_restatfinal.do:

- This do file compiles the incentive data and produces Panel A of Table 1.

startstop_revised.do:

- This file merges in the starting and ending production dates for each vehicle.
- This file uses startstop.csv and the output from **merging_incentives_restatfinal.do**

regs_prep_restatfinal.do:

- This data file organizes the data for the regressions.
- This file calls **regs_weight_revised_model.do**, which is the file that creates the vehicle weights and Table 3
- This file uses the output from **startstop_revised.do**

regs_main_restatfinal.do:

- This is the regression file. It creates Table 2, Table 4, Table 6, Table 7, and Table 8.
- This file uses the output from **regs_prep_restatfinal.do**
