**FOCUS ON FLOODING – Houston, TX San Jacinto River Basin Area**
**Nurture Nature Center - Eaton, PA**
Research Project with National Oceanic & Atmospheric Administration
07/23/2024 18:00 - 20:00
Meeting Notes

Community Needs:

1. Information compiled into a format that gives a complete assessment of flooding possibilities, not one that provides piece meal information.
   a. Storm Surge
   b. Tidal rise injunction with Storm Surge and other factors
   c. Upstream flood water impacts
   d. Imperviable surface effects/Increase in imperviable surface areas near floodway needs to be accessed.
   e. Flood Impediments - Water displacement effects i.e manmade structures such as bridges & RR Trestles, barge mooring areas, pilings, docks
   f. Changes in topography of floodway/river banks effecting water flow & direction.
   g. Increase in amount of rain and flood gauges to give a better analysis of water amounts and speed in more concise areas.

**11: Where do you get information about imminent extreme weather events, such as flooding and hurricanes? Please check all that apply.**
