Should Aid Reward Performance? Evidence from a Field Experiment on Health and Education in Indonesia

Authors: Benjamin A. Olken, Junko Onishi, and Susan Wong

1. Data

The directories “Wave I”, “Wave II”, and “Wave III” contain the original survey and MIS data in folders labeled “Data”. “Wave I” contains data from the baseline survey while “Wave II” and “Wave III” contain data gathered after the first and second waves of the intervention.

2. Do-files

The do-file “131228 masterdo_full.do” contains detailed information on each of the sub do-files used to generate intermediate datasets and the tables in the paper. This file also contains information on the input and output datasets created by each sub do-file.

Users should update the directory path found at the top of the files “131228 masterdo_full.do” and “131228 tables_final.do” to reflect the location of the directory on their computer once downloaded. Following that, all data and output files needed to replicate the main findings of the paper in Tables 3 through 13 can be generated by running “131228 masterdo_full.do”.

The sub do-files provide specific definitions of variables generated for the analysis at the top of each file where relevant.
