BORDERS, GEOGRAPHY, AND OLIGOPOLY: EVIDENCE FROM THE WIND TURBINE INDUSTRY

Cosar, Grieco, and Tintelnot

README - SummaryStats

This directory contains state code to produce tables and figures that appear in the paper. Some of the formatting in the paper may be different than the formatting produced by this code, but the calculations are consistent.

Some of this code uses data_structures.mat and est_point.mat as an input, and these file are redacted because they contains proprietary data. In order to run the some code, these mat files must be copied into this directory.
