==========
Project Code: UMAS0015c
Project Name: Massachusetts Registered Voters 2014, Pt 3
Prepared for: Brian Schaffner
Interviews: 800
Field Period: October 20, 2014 to October 27, 2014
Project Manager: Sam Luks - 650.462.8009
==========

YouGov interviewed 870 respondents who were then matched down to a sample of 800 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, education, party identification, ideology, and political interest. The frame was constructed by stratified sampling from the full 2012 American Community Survey (ACS) sample with selection within strata by weighted sampling with replacements (using the person weights on the public use file). Data on voter registration status and turnout were matched to this frame using the November 2012 Current Population Survey. Data on interest in politics and party identification were then matched to this frame from the 2007 Pew Religious Life Survey. The matched cases were weighted to the subset of Massachusetts registered voters from the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, and years of education. Weights were post-stratified by information from current Massachusetts party registration statistics. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

Likely voters were defined as the subset of men reporting a greater than 95% likelihood of voting plus the subset of women reporting a greater than 90% likelihood of voting.

MoE: 3.8%
Likely Voter MoE: 4.4%

Variable List

==========

Name	Description
caseid	Case ID
weight	Case weight
