Replication Data for "Buying Inertia: Preempting Social Disorder with Selective Welfare Provision in Urban China"

Jennifer Pan

The steps below outline the procedures followed in writing this dissertation:

1) Data: the data used in Chapters 2, 3, 5, and 6 are included in the replication file:
   - Chapter 2 data: chapter2.csv
   - Chapter 3 data: chapter3.csv, chapter3_lianghui.csv, chapter3_bycity.csv
   - Chapter 5 data: neighborhood.csv
   - Chapter 6 data: neighborhood.csv

   For data used to generate results in Chapter 4, see replication data for "Sources of Authoritarian Responsiveness: A Field Experiment in China"

2) Generating results: in files accompanying this document, you will find R code to generate all the plots and empirical results found in the dissertation. Documentation of code and data can be found within the replication.R file.
