RSCT - RSCT: Count of household adults

RSCT: Count of household adults

RSCT: Hello. We are conducting a study to determine how people feel about various aspects of life in Southern California. The topics we would like to talk about relate to entertainment, health and work. This study is an important part of the teaching and public service work of UCLA. Your household has been randomly selected for this study. [If necessary, say: Your telephone number has been scientifically chosen to represent Southern California households, and therefore your cooperation is very important in order for this survey to be an accurate representation of the beliefs, attitudes and behaviors of Southern Californians. Everything you tell us will be strictly confidential. Your name will not be connected in any way with the findings of this important study.]
In order for me to determine who I am to interview, I need to make a list of all adults who live in your household, that is, the first names of all persons who are 18 years of age and older who are currently residing there and are permanent household members. How many persons in your household are at least 18 years of age? {If necessary, say: In order to obtain a scientific sample we must make a random selection of all those members of your household. I will ask for first names only. All information is kept strictly confidential, names and phone numbers are not connected to the results of our study.]
