When Is Discrimination Unfair

Replication Package

3_ Additional Analyses (Appendix 7)

Description of Files

This folder contains the following R files:

a. alpha_appendix_A7_3.R
b. alpha_appendix_A7_4.R

These are standalone R files that provide the confidence intervals for α (refer to Appendices 7.3 and 7.4 for details behind this parameter).

These two files must be run independently since they contain code in R.

However, these do not rely on importing any standalone data files, unlike the former do-files.

Instead, the inputs are manually entered based on the values calculated in 4_tables.do (See lines 3389-3406 and 3472-3489).
