Codebook

"Are Politicians Biased Against Ethnic Minority Candidates? Experimental Evidence from Norway."

Magnus Carlsson, Henning Finseraas and Arnfinn Midtbøen

Variables in the data set politicians_experiment.dta

profile: politician profile presented to the respondent

malik: indicator for assignment to the Malik profile

warsam: indicator for assignment to the Warsam profile

minority: indicator for assignment to a minority profile

quality: evaluation of profile quality

ranking: evaluation of profile ranking

electable: evaluation of profile electability

quality1: evaluation of profile 1's quality

quality2: evaluation of profile 2's quality

ranking1: evaluation of profile 1's ranking

ranking2: evaluation of profile 2's ranking

electable1: evaluation of the electability of profile 1

electable2 evaluation of the electability of profile 2

male: indicator of male gender

university: indicator for university education

age: respondent age

missage: indicator for missing age

west: indicator for residency in Western Norway

north: indicator for residency in Northern Norway

leftparty: indicator for representing left wing party

nonracist: measure of motivation to control prejudice

imcpd: alternative measure of motivation to control prejudice

imshare: share of immigrants in the municipality

enop: effective number of parties in the municipality

minorityXleftparty: interaction minority profile and left party

minorityXimshare: interaction minority profile and immigrant share

minorityXenop: interaction minority and effective number of parties

minorityXnonracist: interaction minority and motivation to control prejudice

minorityXimcpd: interaction minority and alternative measure of motivation to control prejudice

leftpartyc: mean-centered version of left party

malec: mean-centered version of male

universityc: mean-centered version of university education

agec: mean-centered version of age

missagec: mean-centered version of missing age

westc: mean-centered version of Western Norway residency

northc: mean-centered version of Norther Norway residency

w: weight

others_notme: measure of propensity to give social desirable answers

minorityXothers_notme: interaction between minority and propensity to give social desirable answers

control: indicator for control group

treated: indicator for treatment group

id: respondent ID

Variables in data set voters_experiment.dta

treatment: treatment indicator

number: number of characteristics reported (outcome)

missing: indicator of missing outcomes

male: indicator for male gender

university: indicator for completed university education

age: respondents age

west: indicator for residency in Western Norway

north: indicator for residency in Northern Norway

leftparty: indicator for left party voting

treatmentXleftparty: interaction between treatment and left party voting

secondlist: indicator for whether the observation is from the second list experiment

vekt: survey weight

treatXsecond: interaction between treatment and whether the observation is from the second list experiment

leftpartyc: mean-centered version of leftparty

secondlistc: mean-centered version of secondlist

malec: mean-centered version of male

agec: mean-centered version of age

university: mean-centered version of university

northc: mean-centered version of north

westc: mean-centered version of west

treatXleftpartyc: interaction between treatment and mean-centered left party voting

treatXsecondlistc: interaction between treatment and mean-centered second list indicator

treatXmalec: interaction between treatment and mean-centered male indicator

treatXagec: interaction between treatment and mean-centered age variable

treatXuniversityc: interaction between treatment and mean-centered university education indicator

treatXnorthc: interaction between treatment and mean-centered Northern Norway residency

treatXwestc: interaction between treatment and mean-centered Western Norway residency

treatmentc: mean-centered version of the treatment indcator

secXleftpartyc: interaction between second list experiment and mean-centered left party voting

secXtreatmentc: interaction between second list experiment and mean-centered treatment

secXmalec: interaction between second list experiment and mean-centered male

secXagec: interaction between second list experiment and mean-centered age

secXuniversityc: interaction between second list experiment and mean-centered university education

secXnorthc: interaction between second list experiment and mean-centered Northern Norway residency

secXwestc: interaction between second list experiment and mean-centered Western Norway residency

treatcXleftpartyc: interaction between mean-centered treatment indicator and mean-centered left party voting

treatcXsecondlistc: interaction between mean-centered treatment indicator and mean-centered second list

treatcXmalec: interaction between mean-centered treatment indicator and mean-centered male

treatcXagec: interaction between mean-centered treatment indicator and mean-centered age

treatcXuniversityc: interaction between mean-centered treatment indicator and mean-centered university education

treatcXnorthc: interaction between mean-centered treatment indicator and mean-centered Northern Norway residency

treatcXwestc: interaction between mean-centered treatment indicator and mean-centered Western Norway residency

treated: indicator for treatment group
