================================================================================
Project Code: INDU0005
Project Name: Indiana - 200% FPL Indiana
Prepared for: David Konisky
Interviews: 2000
Field Period:  April 30, 2020 - June 02, 2020
Project Manager: Sam Luks  - 650.462.8009
================================================================================
```

YouGov interviewed 2254 respondents who were then matched down to a sample of 2000 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, education and state. The frame was constructed by stratified sampling from the 2017 American Community Survey (ACS) 1-year sample of low income individuals in Indiana (defined as those whose income is 200% of the Federal Poverty Level or less), with selection within strata by weighted sampling with replacements (using the person weights on the public use file).

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, and region. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.
