This document describes the files needed to reproduce the results reported in:

> Rodon, Toni; Sanjaume-Calvet, Marc "How fair is it? An experimental study of perceived fairness of distributive policies", *The Journal of Politics.*

The reproduction files are as follows:

1. 01_clean&stack.R: an R script file to clean and prepare the dataset for the empirical analysis.
2. 02_analysis.R: the main R analysis file used to produce the results reported in the paper.
3. 03_appendix.R: an R script file used to produce the results reported in the online appendix.
4. conjoint.xlsx: the raw data file used by 01_clean&stack.R, in Excel format.
5. conjoint-data-stacked.R: the dataset created by 01_clean&stack.R and used in 02_analysis.R
6. ses_data.xlsx: the raw data file with data on participants' sociodemographic characteristics, in Excel format (extracted from Prolific).
