The Research Team Are Available 24hrs/day, 7days/week

Research contact telephone: 0992 892 116

Back up telephone numbers: 0999 659 099 or **0992 892 117**

For routine safety check-in send SMS: **0992 892 118**

Illness	Action
Mild	**Contact research team <u>during the day</u>** We will offer telephone advice, request attendance at the research ward for further tests or recommend that you start taking antibiotics. We recommend contact if you are concerned about any mild symptom not on the moderate list that develops during the study period.
Moderate	**Contact research team <u>day or night</u>** We will offer telephone advice, request attendance at the research ward for further tests or recommend that you start taking antibiotics. We especially request that you contact us if you have these symptoms: **Fever with temperature >37.5˚C (recheck if below 36˚C), shivering, headache, new rash, drowsiness, cough, earache and/or eye infection**
Severe (this has never happened before)	**Go DIRECTLY to Mwai Wathu Casualty Department** (you will not be charged for attendance if you show this card to the medical team) **Call emergency research doctor as above** **Start taking antibiotic provided** (one tablet of amoxicillin three times per day)

If you have symptoms, please check your temperature.
Keep the provided antibiotics with you at all times during the study period
Please contact the research team before starting antibiotics if possible.

Gulu lopanga kafukufuku likupedzeka pa nthawi yina yiriyonse yapatsiku kwa matsiku onse pasabata

Nambala ya foni yakafukufuku: **0992 892 116** Nambala zina za foni zapadera: 0999 659 099 kapena **0992 892 117** Kuyang'anira zoti ndinu otetezeka tumizani uthenga waufupi pa: **0992 892 118**

Matenda	Zochita
Pang'ono	**Lumikizanani ndi gulu la kafukufuku <u>nthawi ya masana</u>** Tipereka malangizo apa foni, tikupemphani kuti mupite ku chipinda cha kafukufuku ku chipatala kuti aka kuyezeninso kapena kukulimbikitsani kuti mumwe mankhwala. Timakulimbikitsani kuti mulumikizane nafe ngati muli ndi nkhawa zokhudza zizindikiro zapang'ono koma osati mndandanda wazizindikiro zokulirapo zomwe zimabwera munthawi yakafukufuku.
Ochepa	**Lumikizanani ndi gulu la kafukufuku <u>nthawi ya masana</u>** Tipereka malangizo apa foni, tikupemphani kuti mupite ku chipinda cha kafukufuku ku chipatala kuti aka kuyezeninso kapena kukulimbikitsani kuti mumwe mankhwala. Mwapaderadera tikukupempani kuti mulumikizane nafe ngati muli ndi zizindikiro izi:**Kutentha thupi kopitilira 37.5˚C (kuyezanso ngati yiri yosapitirira 36˚C) kunjenjemera, zilonda zapakhungu zongobwera kumene, kugonagona, chifuwa, kupweteka makutu komanso matenda a mmaso**
Aakulu (izi sizinayambe zachitikapo)	**PITANI ku malo ofikira odwala ku Mwayiwathu** (simukalipiritsidwa mukakaonetsa khadi iyi kwa gulu logwira ntchito kuchipatala) **Yimbirani dokotala wofulumira wa kafukufuku pa nambala mwapatsidwa pamwambayo** **Yambani kumba mankhwala mwapatsidwawo** (pilisi limodzi la Amoxicillin katatu patsiku)

Ngati muli ndi zizindikiro za matenda, chonde yezani kutentha kwa thupi lanu. Sungani pafupi ndi inu mankhwala mwapatsidwawo mu nthawi yonse zakafukufuku. Chonde lumikizanani ndi gulu lakafukufuku musanayambe kumwa mankhwala ngati kuli kotheka.
