Citizen Involvement in Public Policy:

Does It Matter How Much Is at Stake?

Ramon van der Does
ramon.vanderdoes@uclouvain.be

The files in this archive contain data to replicate the analyses reported in "Citizen involvement in public policy: Does it matter how much is at stake?" (accepted for publication in *Public Administration*).

File name	Description
Benoordenhout_Data.xlsx	Data for the survey experiment conducted in Benoordenhout
NL_Data.xlsx	Data for the survey experiment conducted among a Dutch population sample
Figure2_Data.xlsx	Data to reproduce Figure 2 (i.e. voting rates and size of electorates in Dutch ePBs)
PADM_ReplicationScript.R	R script to replicate the quantitative analyses reported in the paper
PADM_InterviewData	Anonymized versions of original answers to the interview questions used in the qualitative analyses

Notes:

- The Supporting Information on the journal's website provides further details on the semi-structured interviews (i.e. recruitment strategy and original topic guide).
- The original survey materials can be accessed via the Open Science Framework at https://osf.io/7534d and https://osf.io/y2x5e.
