Data for: manuscript submitted to *AERA Open* (July, 2021)

This memo documents the data files and analysis files used to generate the estimates found in the paper submission.

The data were collected by the research team from the online questionnaires. They are not publicly available elsewhere and have been anonymized. The data contain demographic info (e.g., age) and teachers' ratings on their motivation and instruction (e.g. goal orientations). All data needed for replication can be found in "goals-data."

The SAV file "goals-data" can be used to generate Tables 1-2 and Figure 1 in the paper. Table 1 can be made from SPSS. Table 2 and Figure 1 can be made from MPlus.
