The following files are included in this replication material:

- `Replication.R`: This R file contains the code for replicating the regression results of the paper as well as a short codebook.
- `data_what_drives_international_cooperation.Rdata`: In this file in R format, two datasets are stored for replication. See codebook in the `Replication.R` file for a short overview of what they contain.
- `Replication_output.pdf`: This file shows the output of the replication file. Note: the figures in this file are somewhat distorted since they are written directly from R Markdown into the file. For an exact replication of the figures, use the provided replication code, which will write each figure into a separate file.
