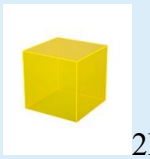
Cerebral Cortex Empathic Theory

David Render

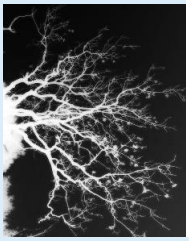
Cerebral Cortex Empathic Theory

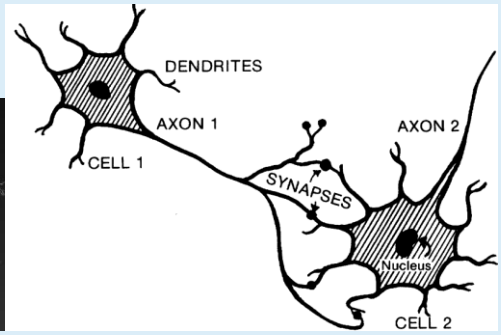
2 Neurons MM which are very small make thousand 20,000 Neurons . 2 mm makes up 6km of neighbors of connect messages in the brain.



2MM

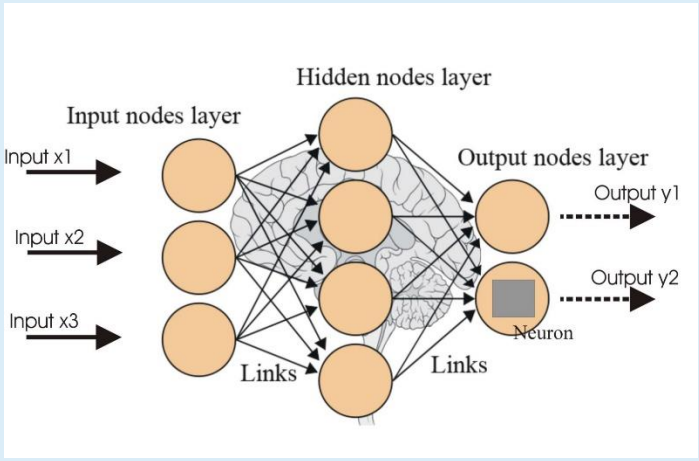
20,000 NEURONS





Above (Left) is Neurons and dendrites in the brain.

Below (Right) how information passes and the brain Network.



This gives interconnected network communication.

Associate Memory (AM)

Read this Message!

It is soo a*esome that w*at your *ind and e*es can s*e is ab le to read *nd un*ersta*d this witho*t a** of the in*orm*ti*n le*ters

The processing and memory are connected, they are not separated.
