Readme file for "From 'Is it unconfounded?' to 'How much confounding would it take?': Applying the sensitivity-based approach to assess causes of support for peace in Colombia"

(Hazlett and Parente, 2022, *Journal of Politics*)

Analyses were done using R Studio version 1.3.1056 "Water Lily" for Windows, running R version 4.0.2 (2020-06-22) -- "Taking Off Again"

LIST OF FILES

Hazlett_Parente_ConditionallyAcceptedManuscript.pdf
Copy of the conditionally accepted manuscript

Hazlett_Parente_SupplementaryMaterial.pdf
Copy of the supplementary material Appendices A-F accompanying the conditionally accepted manuscript

Hazlett_Parente_ReplicationCode.R
R file containing replication code
(Note: data used in the analyses in the paper are loaded directly from sensemakr package, as indicated in the replication file)

mapdata.csv
CSV file used to make the maps in Figure A1

Replication_Log.txt
File demonstrating that all the code in Hazlett_Parente_ReplicationCode.R runs

Hazlett_Parente_codebook.pdf
Description of variables in replication datasets
