PARTICIPANTS INFORMATION SHEET

[Post-Training Survey]

Title:	Evaluating Knowledge, Competency, Feasibility and Acceptability of a Digital Training Course on Hormonal IUD for Private and Public Sector Family Planning Providers in Nigeria: A Mixed Methods Study
Protocol Number:	IRBNet #: 1735182
Sponsor:	USAID, Bill and Melinda Gates Foundation (BMGF)
Principal Investigators:	Kristen Little, PhD (PSI) & Marya Plotkin, DrPH (FHI 360)
Address:	Population Services International (PSI) 1120 19th Street NW, Suite 600 Washington, DC, USA 20036
Site(s):	Selected health facilities and other service delivery sites, Lagos, Kaduna, Enugu states, Nigeria
Study Contact:	Dr. Anthony Adindu Nwala Society for Family Health & Study Co-Investigator [Removed]

Information about the study

- You are being asked to take part in a survey about your experience with the hormonal inter-uterine device (IUD) digital training conducted by SFH/Nigeria. You were selected as a potential participant because you participated in the digital training.
- The purpose of this research is to better understand the acceptability, feasibility, and quality of the digital training course for the hormonal IUD.
- We are asking if you would like to participate in a post-training survey about your experiences. The survey should take less than 20 minutes to complete and will be conducted online.
- If you participate, we will ask questions about the devices you used to take the training and your opinions about the training content. Your answers to the survey will be kept anonymous.
- You can still participate in the digital hormonal IUD training even if you do not want to do the survey.

Possible risks

- If you decide to participate, the survey will take some of your time, but otherwise should not be associated with any physical, social, or psychological risks. There is a risk that your participation in this study or what you say could be discovered by others. To protect your privacy, we will not share your involvement in the study with anyone (including your employer), and we will not include your name or other identifying information with anything we share.

Possible benefits

- There will be no direct benefit to you for participating in this study. However, the information we gather will be used to improve the digital curriculum on the hormonal IUD for family planning providers in Nigeria.

Voluntary participation

- You are free to decide if you want to take this survey. You do not have to answer any questions you do not want to answer, and you can stop the survey at any time.
- If you agree to participate and then you change your mind, you may end your participation without any penalty at any time. Your decision to participate or anything you tell me will not affect your ability to be invited for other provider trainings and will have no impact on your employment.

Confidentiality

- We will protect information about you and your taking part in this survey to the best of our ability. We will not associate any data that identifies you with your responses. We will not share any information that could be linked back to you personally with anybody outside of our research team. We will protect information about you and your participation in this research study to the best of our ability and will store all data on password-protected electronic devices.
- Information you provide that does not identify you will be shared with others and could be used by others without additional informed consent from you.

Compensation

- If you complete the exit survey, we will give you phone credit worth N2,000 in appreciation of your time. This will be sent directly to your phone using VTU.

If you have a question about the study

If you have any questions about the research, call Dr. Anthony Adindu Nwala at [Removed] or email: [Removed].

Your rights as a participant

This research has been reviewed and approved by the Institutional Review Board of FHI 360 (Protection of Human Subjects Committee) and the National Health Research Ethics Committee.
