Replication Package

Paper: "The Microfoundations of Negotiated Peace: Generalized Trust and Support for Peace Processes in Colombia and Guatemala"

Authors: Ryan E. Carlin, Gregory J. Love, Jennifer L. McCoy, Jelena Subtic

Journal: *Public Opinion Quarterly*

Corresponding Author: Gregory J. Love (gjlove@olemiss.edu)

Data Sources

NSF Survey Data (2015): Original survey conducted in Colombia measuring trust through behavioral games and survey questions, along with attitudes toward peace processes. National probability sample of Colombian adults (N ≈ 2,500).

Colombia LAPOP Data (2006-2020): AmericasBarometer surveys from the Latin American Public Opinion Project providing longitudinal data on trust and peace process attitudes across multiple survey waves.

Guatemala LAPOP Data (1999): AmericasBarometer survey from Guatemala during the post-peace accord period, used for cross-national validation.

Instructions

1. Set the `replication_path` global in `POQ_Master_Analysis_Replication.do` to the location where you saved these files:

   ```
   global replication_path "/your/path/here"
   ```

2. Run the master analysis file in Stata:

   ```
   do "dofiles/POQ_Master_Analysis_Replication.do"
   ```

3. Output tables and figures will be saved to the `output/` folder.

Data Availability

The LAPOP AmericasBarometer data are publicly available at www.vanderbilt.edu/lapop and are subject to LAPOP's terms of use. The NSF survey data are provided in this replication package with permission.
